EXPERIENCE

Technical Account Manager December 2024 - Present
Crowdstrike | Remote

Key Responsibilities:

- Acted as a primary technical point of contact for assigned client accounts, ensuring consistent delivery of value-added support and guidance.
- Collaborated with sales, engineering, and product teams to align customer goals with technical solutions, driving customer success and retention.
- Delivered proactive technical guidance, health checks, and performance reviews to optimize system performance and minimize downtime.
- Managed post-sales technical relationships, facilitating smooth onboarding, implementation, and long-term adoption of products/services.
- Developed and presented detailed reports, technical documentation, and best practices tailored to each client's infrastructure.
- Monitored usage metrics and customer feedback to identify risks and opportunities for upselling or expansion.

Technical Support Specialist September 2022 - December 2024
Upshop | Toronto, ON

Key Responsibilities:

- Delivered global technical support for Invatron software, achieving a 95% client satisfaction rate by resolving critical issues and reducing system downtime by 30%.
- Led onsite and remote setups, configurations, and upgrades for MS SQL, IIS, and PHP, ensuring 100% project deadline compliance.
- Deployed and maintained Azure Cloud services (Virtual Network, VMs, Blob Storage), enhancing resource provisioning efficiency by 40%.
- Streamlined database management processes (MySQL, MongoDB, MSSQL), reducing backup times by 25% and ensuring zero data loss during migrations.
- Generated detailed Oracle-based reports, driving a 15% improvement in operational efficiency through actionable insights.
- Designed visually impactful Excel dashboards, increasing project approval rates by 10% and simplifying data analysis for stakeholders.
- Authored comprehensive project documentation, reducing team onboarding time by 25% and improving support resolution rates by 15%.

Technical Support Specialist L2 December 2021 - September 2022
SOTI | Mississauga, ON

Providing a world class Customer Service in a mobile device management technical support role to enterprises around the globe.

Key Responsibilities:

- Configured customer systems with Cisco Network protocols and robust Firewall protections, enhancing security compliance by 20%.
- Ensured seamless deployment by generating and applying critical certificates for server and web console services.
- Optimized SQL databases, including query execution and data management, improving database performance by 15%.
- Designed secure L2VPN and IPSEC-based VPN services, increasing network reliability and encryption strength.
- Executed cloud infrastructure automation using Terraform and CloudFormation, reducing deployment times by 40%.

System Technician March 2021 - December 2021
National Time | Toronto, ON

Key Responsibilities:

- Conducted physical server installations and cable management, achieving a 100% uptime for client systems during deployment.
- Configured Windows Servers and DNS/DHCP environments, streamlining network management by 20%.
- Managed server backups for on-premise and cloud systems, ensuring zero data loss during critical recovery events.
- Installed and maintained Cisco and Juniper routers and switches, increasing network throughput by 25%.
